Scenario Questions Based on Confusion Matrix

I. SVM – Classification

1.What is the overall performance of your model ?

My model overall performance = **0.75 %**

2.What is the correct classification percentage of Purchased ?

My model correct classification percentage of Purchased = **0.41 %**

3.What is the correct classification percentage Not Purchased ?

My model correct classification percentage of Not Purchased = **0.95 %**

4.What is the percentage of Purchased ?

My model Purchased Percentage = **0.83 %**

5.What is the percentage of Not Purchased ?

My model Not Purchased Percentage = **0.73 %**

6.What is the percentage of F1-Score of Purchased ?

My model Purchased Percentage of F1-Score = **0.55 %**

7.What is the percentage of F1-Score of Not Purchased ?

My model Not Purchased Percentage of F1-Score = **0.83 %**

8.What is the average performance of Precision ?

Average performance of Precision = **0.78 %**

9. What is the average performance of Recall ?

Average performance of Recall = **0.68 %**

10. What is the average performance of F1-Score?

Average performance of F1-Score = **0.69 %**

11. What is the Probability of Precision ?

Probability of Precision = **0.77 %**

12. What is the Probability of Recall?

Probability of Recall = **0.75 %**

13. What is the Probability of F1-Score ?

Probability of F1-Score = **0.72 %**

II. Decision Tree – Classification

1.What is the overall performance of your model ?

My model overall performance = **0.89 %**

2.What is the correct classification percentage of Purchased ?

My model correct classification percentage of Purchased = **0.86 %**

3.What is the correct classification percentage Not Purchased ?

My model correct classification percentage of Not Purchased = **0.90 %**

4.What is the percentage of Purchased ?

My model Purchased Percentage = **0.84 %**

5.What is the percentage of Not Purchased ?

My model Not Purchased Percentage = **0.92 %**

6.What is the percentage of F1-Score of Purchased ?

My model Purchased Percentage of F1-Score = **0.85 %**

7.What is the percentage of F1-Score of Not Purchased ?

My model Not Purchased Percentage of F1-Score = **0.91 %**

8.What is the average performance of Precision ?

Average performance of Precision = **0.88 %**

9. What is the average performance of Recall ?

Average performance of Recall = **0.88 %**

10. What is the average performance of F1-Score?

Average performance of F1-Score = **0.88 %**

11. What is the Probability of Precision ?

Probability of Precision = **0.89 %**

12. What is the Probability of Recall?

Probability of Recall = **0.89 %**

13. What is the Probability of F1-Score ?

Probability of F1-Score = **0.89 %**

III. Random Forest – Classification

1.What is the overall performance of your model ?

My model overall performance = **0.90 %**

2.What is the correct classification percentage of Purchased ?

My model correct classification percentage of Purchased = **0.86 %**

3.What is the correct classification percentage Not Purchased ?

My model correct classification percentage of Not Purchased = **0.92 %**

4.What is the percentage of Purchased ?

My model Purchased Percentage = **0.86 %**

5.What is the percentage of Not Purchased ?

My model Not Purchased Percentage = **0.82 %**

6.What is the percentage of F1-Score of Purchased ?

My model Purchased Percentage of F1-Score = **0.86 %**

7.What is the percentage of F1-Score of Not Purchased ?

My model Not Purchased Percentage of F1-Score = **0.92 %**

8.What is the average performance of Precision ?

Average performance of Precision = **0.89 %**

9. What is the average performance of Recall ?

Average performance of Recall = **0.89 %**

10. What is the average performance of F1-Score?

Average performance of F1-Score = **0.89 %**

11. What is the Probability of Precision ?

Probability of Precision = **0.90 %**

12. What is the Probability of Recall?

Probability of Recall = **0.90 %**

13. What is the Probability of F1-Score ?

Probability of F1-Score = **0.90 %**
